

(a) $N_f \geq 2$ for $p_e = p_{e,crit} = 0.67$.

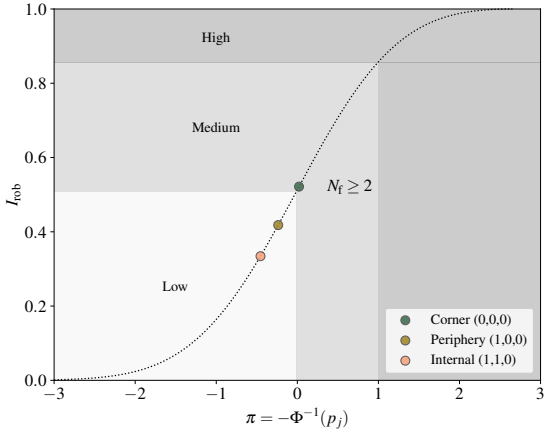

(b) $N_f \geq 16$ for $p_e = p_{e,crit} = 0.67$.

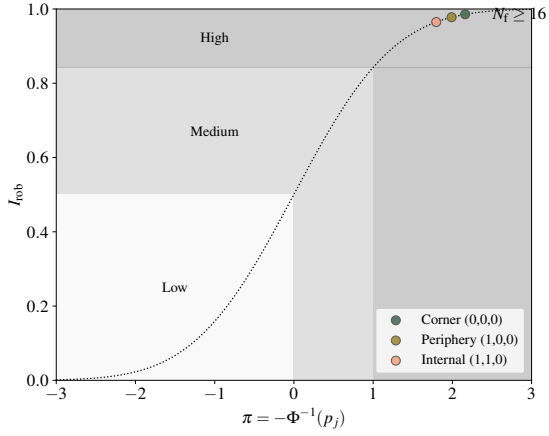

(c) $N_f \geq 2$ for $p_e = 0.40$.

(d) $N_f \geq 16$ for $p_e = 0.40$.

(e) $N_f \geq 2$ for $p_e = 0.20$.

(f) $N_f \geq 16$ for $p_e = 0.20$.

Figure 4: Entropy-based robustness index I_{rob} for notional damages to the system comprising $|\mathcal{N}| = 64$ compartments with various probabilities of failure propagation p_e.
