

(a) Analytical approximation with $N_f \geq 2$ for $p^{\star}_{e,ij} = 0.094$.

(b) Numerical solution with $N_f \geq 2$ for $p^{\star}_{e,ij} = 0.093$.

Figure 5: Entropy-based robustness index I_{rob} for the risk-equivalent failure propagation probability $p^{\star}_{e,ij}$ estimated analytically using Equation 24 and numerically.
